

Tall Stag

Talladega Superspeedway, Talladega, AL - Grant Lynch, Chairman of the Talladega Superspeedway and President of the International Speedway Corporation, is amazed by the difference between the deer plots treated with ***Tall Stag, SumaGrow inside*** and the untreated plots. After treating a portion of the deer plots that are owned by and part of the Talladega Superspeedway property with ***Tall Stag, SumaGrow inside***. Mr. Lynch wrote:

"I truly am *amazed at the product!* Last night I had one hunter who hunted the field with Sumagrow and another who hunted the one [without] Sumagrow. *No deer in the one without, 20 in the field treated with Sumagrow. The fields are less than a ¼ mile from each other.*"

Treated with ***Tall Stag, SumaGrow inside***

Untreated

In fact, a plan to let several farmers hunt the food plots led Mr. Lynch to believe there may be issues over which hunter got to hunt the ***Tall Stag, SumaGrow inside*** treated portion.

When two NASCAR drivers went to hunt there earlier this year the one on the ***Tall Stag, SumaGrow inside*** saw 20 deer. The other driver saw ZERO Deer! I think we know which side the driver was on that saw the 20 deer.
